DENTSPLY MAILLEFER

READY•STEEL™

Perfectly Sterile. Perfectly Maillefer.

The stainless steel Maillefer instruments you trust are now available in pre-sterilized blister packs for single-patient use.

WE KNOW ENDO.

Introducing Maillefer **READY•STEEL™**

Ready When You Are

DENSTPLY Maillefer is an advocate of raising medical standards and is introducing the first step to a new complete sterile stainless steel solution: READY•STEEL™. READY•STEEL files are pre-sterilized and come with perforated blister packs for single-patient use, to bring you peace of mind during your endodontic procedures.

Reduced risk of file breakage*

Endodontic files exhibit signs of wear during normal use, which increases dramatically with multiple use. Single use reduces the risk of file breakage and increases patient safety.

Optimal cutting efficiency*

Research has shown that using files for multiple cases reduces their cutting efficiency, and leads to a poor performance. Cutting efficiency is achieved when a new instrument is used for each patient.

No risk of cross-contamination*

Research shows that certain bacteria and tissue remnants may remain on the instrument, post-sterilization. Single-patient use will eliminate such risk.

*Data available upon request.

Product	Details	Specs
FlexoFiles® Stainless Steel 	**Uses:** Exploration, canal patency, establishing glide path, cleaning and shaping, and apical gauging **Features:** Markings on end of handle, enhanced flexibility, safe-ended non-cutting Batt® tip, 25 and 31 mm have x-ray visible calibration in rings, and silicone stoppers	**Lengths:** 18, 21, 25, 31 mm** **Sizes:** 06, 08, 10, 12, 15, 17, 20, 22, 25, 27, 30, 32, 35, 37, 40, 45-80, 90-110, 120-140 **Pack of:** 6, assorted available **Cross Section:** ■ in sizes 6, 8 ,10 ▲ in larger sizes
Senseus® FlexoFiles® Stainless Steel 	**Uses:** Exploration, canal patency, establishing glide path, cleaning and shaping, and apical gauging **Features:** Markings on end of ergonomic handle, flexible, improved tactile feedback, 25 and 31 mm have x-ray visible calibration in rings, and silicone stoppers	**Lengths:** 21, 25, 31 mm** **Sizes:** 6, 8, 10, 15-60 **Pack of:** 6, assorted available up to size 80 **Cross Section:** ■ in sizes 6, 8 ,10 ▲ in larger sizes
K-File Stainless Steel 	**Uses:** Exploration, canal patency, establishing glide path, cleaning and shaping, and apical gauging **Features:** Markings on end of handle, safe-ended non-cutting tip, and silicone stoppers	**Lengths:** 21, 25, 31 mm** **Sizes:** 6, 8, 10, 15-80 **Pack of:** 6, Assorted Available **Cross Section:** ■
C+File Stainless Steel 	**Uses:** Accessing and cleaning calcified root canals **Features:** Ultra-stiff design, markings on end of handle, silicone stoppers and calibration rings	**Lengths:** 21, 25 mm **Sizes:** 6, 8, 10, 15 **Pack of:** 6 **Cross Section:** ■
Hedstrom File Stainless Steel 	**Uses:** Probing, permeabilization or extraction of debris **Features:** Markings on end of handle, safe-ended non-cutting tip, and silicone stoppers	**Lengths:** 21, 25, 31 mm** **Sizes:** 10, 15-80 **Pack of:** 6, assorted available **Cross Section:** ●
K-Reamer Stainless Steel 	**Uses:** Exploration, canal patency, establishing glide path, cleaning and shaping, and apical gauging **Features:** Markings on end of handle, safe-ended non-cutting tip, and silicone stoppers	**Lengths:** 21, 25, 31 mm** **Sizes:** 6, 8, 10, 15-60 **Pack of:** 6, assorted available up to size 80 **Cross Section:** ▲

**Not available in all sizes. Please contact your sales rep for details.

Why Pre-sterilization?

READY•STEEL™ files are conveniently packaged in pre-sterilized blister packs. In addition to its convenience, using a new pre-sterilized file for each patient will:

- Control costs by doing away with cleaning and sterilizing files.
- Maintain optimal cutting efficiency with a new file for each patient.
- Eliminate risk of cross-contamination from inconsistent sterilization procedures.

WE KNOW ENDO.
